PREFATORY NOTE

THIS seventy-eighth yearly issue of THE ENGLISH CATALOGUE OF BOOKS comprises the titles (under authors, and subjects or titles) of works published during 1914, and also of some received too late for inclusion in the seventy-seventh issue.

The main entry for each book begins with the author's surname (if known) in **heavy type.** As an index to these "Author" records, entries are also made under the titles, commencing with their most important words (which usually indicate the *subjects* with which the books deal), or with the first words; the name or word under which the main entry appears is printed in *italics* in these index entries, thus giving a reference to the place where the full information about a book may be found. Main entries and index entries are in one alphabet.

Writers with compound names are entered under the first part of the name, *e.g.*:—

Baring-Gould (Sabine)

and accordingly must be looked for in that order. References are also made, however, from the last part of the name.

The publications of learned Societies are recorded in an Appendix.

The names and addresses of the Publishers of Great Britain and Ireland, followed by those of the principal publishers in the United States and Canada, will be found at the end of the volume. The telegraphic and cable addresses and telephone numbers have been added when known.

Following the Preface is an analysis of the books of the year 1914, showing in detail the number of works in each class of literature, and giving the proportions of new books, translations, pamphlets, and new editions.

Hearty thanks are due to many publishers, secretaries, librarians, authors and bibliographers who have assisted in making this book more correct and comprehensive than it would have been otherwise.

The Editor will be glad to have particulars (author, title, size, price, publisher, and month of publication) of any work which may have been omitted. Information regarding each book should be given on a separate slip of paper or postcard. It should be addressed to *The Editor of* THE ENGLISH CATALOGUE OF BOOKS, "Publishers' Circular" Office, 19, Adam Street, Strand, London, W.C.

ANALYSIS OF BOOKS

PUBLISHED DURING 1914

In common with other industries the publishing trade has been affected by the European War, but not so seriously as might have been expected. The number of books recorded as having been published during 1914 is 11,537, a decrease of 842 as compared with the total of last year. Up to the end of July, the figures for 1914 show a considerable increase over the previous year's figures; but from August to October, there is a slump which places 1914 below 1913. A decided recovery is noticeable in the totals for November and December. But for the outbreak of war, this year's publishing undoubtedly would have shown an increase over any previous year; and it is extremely satisfactory to have so comparatively small a set-back to record during the present period of stress. At the same time, it must be noted that the greater part of the recorded decrease is to be found in the totals for new books; and that the number of pamphlets has increased this year. The meaning of this is, of course, that the average quality of book published during 1914 is somewhat lower than formerly; and the cause of this decline in average quality is to be found in the natural reluctance on the part of publishers to place expensive works on a disturbed market, combined with the issue of numerous ephemeral works dealing with the War.

The decrease this year has been spread fairly evenly over the various classes of literature. The principal *decreases* are to be found in the following classes: Philosophy, 101; Sociology, 222; Fine Arts, 50; Fiction, 392; Description and Travel, 167; and Biography, 101. The principal *increases* are: Religion, 80; Science, 108; and Literature, 32. A new heading, Military and Naval, has been introduced this year, in order to provide a convenient heading for the numerous works dealing with warfare and the present War that are being issued. It should be noted that in the above classes, "Education" includes only books about educational theory and practice, and not text-books on special subjects, which are classed elsewhere; and also that under "Music" only works about music are recorded.

Large though the yearly total is, it would be possible to swell it to a much greater figure by counting numerous leaflets (Government and other), ephemeral pamphlets, the publications of borough councils and other local government bodies, and musical texts. While it is obvious that our total could be increased greatly by the inclusion of all these literary protozoa, the figures would not represent so accurately the book publishing activity of the United Kingdom.

The following totals of the last ten years are of considerable interest:—

Year.	New books.	New editions.	Total.
1905	6,817	1,435	8,252
1906	6,985	1,618	8,603
1907	7,701	2,213	9,914
1908	7,512	2,309	9,821
1909	8,446	2,279	10,725
1910	8,468	2,336	10,804
1911	8,530	2,384	10,914
1912	9,197	2,870	12,067
1913	9,541	2,838	12,379
1914	**8,863**	**2,674**	**11,537**

In the following tables each book is counted as one, whether it is in one or more volumes. Serials that appear later as a collected volume are counted as an ordinary book on the appearance of that volume; so that, for example, the series of "Statutory Rules and Orders" issued by the Government, and amounting to several hundred in the year, are counted as one item on the appearance of the annual collected volume. The same rule applies to volumes of magazines, &c. Further detailed information regarding the year's publishing is supplied by the appended analytical tables.

DIRECTORY OF PUBLISHERS

Publishers are invited to send us their Telegraphic Addresses and Telephone Numbers. Those sent will be found below between square brackets [ ], and separated from each other by a semicolon (;) The Editor will be glad to be notified of any inaccuracy in the following lists for correction in subsequent volumes.

This list of Publishers, with their Addresses, has been compiled principally with a view to supplying information regarding the books in the English Catalogue. This will explain the inclusion of some firms in the list who can scarcely, in the strict acceptation of the term, be called Publishers, since the publication of books forms only an occasional part of their business.

THE ENGLISH CATALOGUE OF BOOKS 1801-1836

The published volumes of the ENGLISH CATALOGUE OF BOOKS do not go back beyond the year 1836. Librarians, bibliographers and booksellers have always found the English books covering the earlier part of the Nineteenth Century, 1801—1836, the most difficult to trace, the trade catalogues for that period being very incomplete as regards the total number of entries, and insufficient as regards the individual entry.

A volume of the English Catalogue, covering the period in question on modern lines, has now been compiled from the weekly and other trade lists, and other sources—the author, title, and subject entries in one alphabet—supplying as far as possible all the information which is wanting in the "London" and "British" Catalogues.
